

Arman Mazlounzadeh

armanexplorer@gmail.com | linkedin.com/in/armanexplorer | github.com/armanexplorer | Open to relocation

SUMMARY

Software Engineer dedicated to backend with 6 years building web platforms and infrastructure across Python/Django, DevOps, and product delivery. Track record of leading small teams, reducing cycle time and defects with CI/CD and tests, and shipping customer-facing features end-to-end. Experienced collaborating across distributed teams; open to relocation.

SKILLS

Languages/Frameworks: Python, Django, JavaScript/TypeScript, React/Next.js, REST APIs

Data/Infra: PostgreSQL, MySQL, Redis, RabbitMQ, Celery, Docker, Kubernetes, NGINX, Linux, Ansible, Grafana

Practices: Microservices, CI/CD (GitHub Actions, GitLab CI), TDD, Scrum, Project and Engineering Management

EXPERIENCE

Senior Backend Engineer (Shopify apps)

Dec 2024 – Present

Partnerz – Remote, UAE

- Shipped bundling features including *Fixed Bundle* and *Mystery Box*; adopted by 10% of users and generating \$1000+ MRR per month.
- Improved onboarding flow and core app surfaces; made Plans Selection responsive, increasing reliability and UX consistency.
- Reduced CI test runtime from 8 to 6 minutes via optimizing test tools; shortened developer feedback loops.
- Operated as a full-stack contributor across backend and frontend, accelerating feature delivery more than 3 times.
- Investigated and resolved merchant issues with Google Logs and Sentry, improving support turnaround.
- Migrated app storage to Google Cloud Storage, configuring bucket permissions and upgrading to Django 4.2 cached storage; secured sensitive content.
- Leveraged Cursor (AI-assisted editor) to boost coding speed 30% and improve React fluency; co-authored team-wide Cursor Rules for consistency.

Tech Lead & Co-Founder

Apr 2023 – Jan 2025

Payvand Capital Management – Remote, Canada

- Led a team of 5-8 engineers building real-estate platforms: Propision (price evaluation; integrated with Divar) and Tokenision (tokenization).
- Introduced CI/CD and a test strategy with GitLab CI and TDD, cutting cycle time by 25% and reducing production defects by 20%.
- Rolled out GitLab and Jira for workflows; defined lightweight processes for planning, QA, and release.
- Released a scalable web app serving 1M+ users, handling 20 concurrent price evaluation requests under 1s; owned architecture and deployment.
- Prepared and presented technical architecture documents for accelerator pitches (TechnoTejarat, DaneshBonyan), enabling final-stage investment consideration and DaneshBonyan approval with loan/support eligibility.
- Interviewed and onboarded DevOps hire, ensuring smooth knowledge transfer before transition.

Software Engineer & Project Manager

Sep 2021 – Mar 2023

Sangyab – Isfahan, Iran (Hybrid/Remote)

- Built image search delivering sub-1s query times over a 1M+ image corpus; automated online delivery to reduce support load by 70% in first month.
- Established staging/production CI/CD; improved page performance from 6s to <2s, driving 150% growth in Google impressions over two months.
- Managed delivery for two products: Sangyab and Parsimages, spanning backend, DevOps, technical scoping, and product planning with founders/POs.

Software Engineer & Co-Founder

Mar 2020 – Aug 2021

Novin Pardazan Arax – Isfahan, Iran

- Launched 3 bespoke web apps using Django and React/Next.js in 6 months; owned deployments and production ops on Linux.

- Implemented CI/CD with regression tests, reducing production issues by up to 40%; added 2FA via SMS plugin, cutting sign-up drop-offs 25%.
- Worked directly with C-level stakeholders on contracts and product proposals.
- Mentored and guided interns (mainly frontend), coordinating learning plans and project contributions with senior staff.

EDUCATION

M.Sc., Computer Engineering (Software)

Defended Feb 2025

Sharif University of Technology (GPA: 4/4, Dean's List). Coursework: Software Testing, Architecture, Methodologies, Patterns, Enterprise Architecture.

B.Sc., Computer Engineering (Software)

Sep 2017 – Aug 2021

University of Isfahan — Rank 1; GPA: 18.81/20, $\approx$ 3.98/4

OPEN SOURCE & VOLUNTEERING

Contributions: fixed storage Windows-style paths (django-imagekit); fixed collection-loading bug in tutorials (milvus-io); clarified date formatter documentation (Calendar-for-gnome); added flexible return-handling in bot setup (django-tgbot).

Volunteer work: Delivered infrastructure for International ISC Conference on Information Security and Cryptology (2021); built medical image analysis desktop app for Isfahan University of Medical Sciences (2021); re-engineered the University of Isfahan graduation website (2018).

PROBLEM SOLVING & COMPETITIONS

First-stage qualifier in national Mathematics & Computer Olympiads (high school); active in ACM programming contests at faculty/regional selections; continuous C++ problem solving since 2015.
